

FINSA

soluciones en madera

DESIGN LINE
BY WESTON PREMIUM WOODS

Company Overview

Headquartered in Santiago de Compostela with 12 production facilities spanning Spain, Portugal and France
Highly diversified, producing a range of wood based building and design products including engineered wood panels, hardwood flooring, outdoor decking, components and veneers

Consistent and Reliable

FINSA controls the entire production value chain:

- Harvest raw materials from FINSA owned sustainable softwood forests
- Raw boards, glue, decorative papers and resins are all produced by FINSA owned plants
- TFL production consistent across all 12 FINSA facilities to ensure flexible production capacity

Innovative and Green

FINSA TFL is available on any FINSA produced panel including particle core, MDF, lightweight, MR, FR, NAUF, compact etc.

FINSA holds many patents and is the only mill capable of producing an MDF-PC hybrid on a continuous press

All factories operate with a 0% material waste factor by converting excess raw materials into energy to power all 12 facilities (and some nearby cities)

The TFL solution for your next project...

FINSA's **fashion forward decors** deliver a European style with 9 textures including:

- Atlas: closing the touch gap between TFL and veneer
- Nude: adds a unique leather finish
- Textil: the real linen interior look and feel
- And 6 more to choose from...

FINSA's manufacturing allows for:

- Maximum 7 week lead times, delivered to US
- Flexible ordering with low minimum quantities and TFL decors on specialty boards
- Consistent high quality, guaranteed
- The right price point

Antibacterial finish on TFL decors at no extra charge
